

## **Arke Systems Announces Partnership with Izenda**

ATLANTA, August 20, 2010 – Arke Systems, a leading provider of portals and business intelligence solutions, including SharePoint, PerformancePoint, and SQL Reporting Services ([www.ArkeSystems.com](http://www.ArkeSystems.com)), announced a new technology partnership with Izenda, a leading provider of on-demand custom reporting and analysis software ([www.Izenda.com](http://www.Izenda.com)). The collaboration provides Arke Systems clients with dynamic reporting capabilities, including comprehensive ad hoc report creation and a broad range of standard reports to help them incorporate business information into their applications and portals.

The latest release of Izenda Reports provides rich, flexible self-service reporting delivered over a browser. Izenda's ad-hoc reporting tool provides users with the ability to easily sort, filter, present and export the data they need to analyze their information without the need for developer's assistance. Izenda Reports is based on the latest Microsoft technology platforms and supports ASP.NET 2.0, 3.0 and 3.5 plus SQL Server and Oracle.

"The projects we've launched using Izenda Reports have been highly successful," said Eric Stoll, President of Arke Systems. "Izenda Reports is a natural fit for Arke's business intelligence practice. Users will benefit from being able to author their own dashboards and ad-hoc reports without needing a developer. Arke Systems and Izenda share a commitment to providing customers with high value innovative solutions."

"As a software company, we rely on our partners to implement successful solutions," said Sanjay Bhatia, president of Izenda. "Arke Systems is our go to partner when customers need implementation services. We look forward to a longstanding partnership with Arke as our professional services arm."

Chris Spears, Vice President of Business Development for Arke Systems adds, "In today's market, customers want more powerful tools and less dependency on developers. With Izenda in our tool belt, Arke can provide these capabilities quickly and at an affordable price."
