

Arke Systems Celebrates Five Years of Success

ATLANTA, August 17, 2010 - Arke Systems, an Atlanta-based software-consulting firm (www.ArkeSystems.com), marks its five year anniversary in August. The company will celebrate with its valued customers and partners at an event next month.

What started out as a two-person software development team working out of a condo in Buckhead has grown into one of Atlanta's leading software consultancies with headquarters in Lenox Towers. Since its inception in 2005, the company has experienced triple digit growth, added fifteen employees, and has been named a Microsoft Gold Certified Partner.

"We are proud of our accomplishments and grateful to our customers and employees who helped get us here," said Eric Stoll, Arke Systems co-founder and President. "Arke's success is based on the success of our customers. It's gratifying to make customers happy and provide them useful solutions."

Arke Systems provides [custom software](#) and integrations for a number of verticals including web application and software development, social media applications, business intelligence, data management, and eCommerce. Arke specializes in [Sitecore CMS](#), [Microsoft Dynamics CRM/xRM](#) and [SharePoint](#). "The set of business problems we can solve with our toolbox is really unparalleled," stated Chris Spears, Arke Systems co-founder and Vice President of Business Development. "Having the ability to get sales, marketing & operations on the same page has not only helped our clients grow but is what is accelerating our business."

Arke Systems prides itself on having a solid understanding of customer needs and acknowledges that its rapid success is a result of this understanding, its technical resources, and its loyal customer base. "We are proud to have Atlanta's best and brightest developers here under one roof," added Andrew Franklin, Vice President of Operations, Arke Systems. "When their talent is plugged into our development methodologies, great things happen."

"Our team is able to push technology beyond common understanding. Keeping up this pace means staying focused on the things that have made us successful so far – quality, customer service, and innovative solutions," said Stoll.
